

## Protouch Website - Touch Screen

### Objective:

Protouch is a touch screen manufacturing company. They roll out touch screen kiosks, monitors & PCs, EPoS systems and large format digital signage across all industries and if needed design a whole new touch screen just based on the requirement of their client.

Protouch wanted to have web presence a website of Protouch in which they can showcase their products and sell their products online.

### Solution:

Total e-commerce website with rich user interface and easy navigation is built where the user can browse through the product categories and buy them online. Site also has options for Newsletters and Mailing Signup. Content Management system, News Uploading System is developed enabling the administrator to upload the products and news respectively.

### Features:

- ❖ Rich User Interface with easy navigation.
- ❖ Protouch news section where users can get latest information from protouch.
- ❖ Displaying touch screen in different categories.
- ❖ Advanced Search Function
- ❖ Online shopping
- ❖ Payment Gateway integration
- ❖ Save Cart functionality.
- ❖ See Shipping estimates before check out
- ❖ Trade Login
- ❖ User Registration
- ❖ Mailing list Sign up function
- ❖ Content Management System
