

Mind ware Insurance System for Marine goods Transport

Objective:

Mind ware Insurance System is a Software which provides Insurance on marine goods transport. Here need to register Customers, brokers, Ports and port rates for different mode of transport, Goods of different categories, Currencies, LC Terms and General terms and have policies assigned to Different customers and brokers. At any damage of goods the particular Customer for corresponding Policy will get the insured amount according to the Terms and conditions of the assigned Policy.

The Business Challenge:

This system already exists with client from 10 years with Microsoft Office Access 2003, it's having thousands of records, while binding the controls from database with huge number of records system was not responding and browser was getting hanged. So client wants a feature to load all data from database on the fly without being slow performance, even having search functionality from thousands of records.

Features:

- ❖ Digest Authentication with Domain security.
- ❖ User Friendly Interface.
- ❖ Displaying touch screen in different categories.
- ❖ System provides User Level Security with different user access permission from Admin Panel
