

Payroll System (Calculate Employee salaries and details)

Objective:

Payroll System to automate calculation of salary and maintain Employee details

Solution:

Payroll system is more flexible to Calculate Employee salaries it will store Employee Salary structure once defined is taken care during processing. Only days to be paid, manual TDS amount, One-time component and user-defined components need to be entered for the month. Data update can be done in MS Excel like easy screens. For employees joining/leaving during the month, number of days get calculated automatically, and ability import the data from excel sheet , Stop salary payments, Rollback Processing, Direct Bank payment Electronic files, Employees desiring payment by cash/cheque can be updated individually and a separate list of payments cash/cheque wise can be generated. User selectable Logo in pay slip and Pay slip delivery through email Ids for each individual Employee. Other than this so may features are including.

Benefits:

- ❖ Maintain Employee details.
- ❖ Import and export excel sheet into database.
- ❖ Auto Salary calculations based on Employee attendance.
- ❖ Pay slip delivery through Emails for each employee.
