

Telemarketing CRM Software

Objective:

In Today's dynamic business environment certain solutions are needed to remove the usual barriers of businesses and thereby systemize their marketing aspects of business processes in a more efficient way. New Software systems were needed to provide businesses with a powerful yet inexpensive CRM system with more innovative features than that available with custom made solutions. Typical need felt for out-of-box sales lead and opportunity management systems with a highly flexible data capture methods that obviously allow new fields to easily create, position and manage.

Requirements:

Many Telemarketing organizations needed specialized systems for their business to grow rapidly. They have initially tried all MS Excel based systems but realized that some unique and specific IT solution need be designed but did not know where to start and thus approached us with the following specifications as described below

- ❖ In need for a web based Telemarketing system that could produce campaigns from end to end
- ❖ Needed well defined campaigns and quick loading of leads
- ❖ Perfect and ease in Monitoring various calls was requested
- ❖ Special emphasis was needed on E-mail marketing campaigns
- ❖ Wanted a system for handling special Marketing campaigns
- ❖ A System needed to handle Telesales, Lead generation, Appointment setting and Fund raising
- ❖ VoIP SIP integration needed for Call handlings
- ❖ Real Time performance monitoring requested
- ❖ Auto dialer with Call Pricing to preview instant contact information needed in the new system
- ❖ Wanted a method to send Notifications as and when E-mails opened
- ❖ Application integration with various Payment Gateway services requested
- ❖ Needed an Integrated Report Writer

Solution:

After a cautious and staged evaluation, a complete end to end world class hosted CRM has been developed. The system is a full featured CRM in the cloud which is highly configurable to all situations. It has been specially defined as a cross between CRM system and a call center system used by some clients even for Advanced Scripting. The custom CRM and integrated phone system is the backbone of the business and provides with significant competitive advantage. Flexibility of this CRM software system has resulted in more business efficiency for various organizations.
